Mechanisms of Ageing and Development
116 (2000) 221–224

mechanisms of ageing and development

www.elsevier.com/locate/mechagedev

Subject index of volume 116

Acetylcholine; Gene therapy; Parkinson's disease; Huntington's disease; Motor performance; Neurotransmitter receptor; Striatum; Memory; Mutant mice **116**, 77

Activator protein-1 (AP-1); Ageing; Gene expression; Nuclear factor-κB (NFκB); Skeletal muscle; Superoxide dismutase **116**, 33

Active vitamin D; Osteoporosis; Bone resorption; Bone formation **116**, 103

Adenovirus; Gene therapy; Gene transfer; Nitric oxide synthase; Stroke; Vector **116**, 95

Ageing; Activator protein-1 (AP-1); Gene expression; Nuclear factor-κB (NFκB); Skeletal muscle; Superoxide dismutase **116**, 33

Ageing; Fasting; Glycogenolysis; Glycolytic flux; Ischemic contracture **116**, 15

Aging; Colonic mucosa; Cyclins; Cyclin-dependent kinases; $p21^{Waf-1}$; p53; Retinoblastoma **116**, 1

Aging; Energy intake; Energy metabolism; Anorexia; Body composition **116**, 157

Alzheimer disease; Oxidative stress; Neurofibrillary tangles **116**, 169

Anorexia; Energy intake; Energy metabolism; Aging; Body composition **116**, 157

Antioxidants; Prostaglandins; Glutathione *S*-transferase; Detoxification enzymes **116**, 135

Apoptosis; Creutzfeldt–Jakob disease; Prion protein; Neurotoxicity; Oxidative stress; Cerebrospinal fluid; 14-3-3 protein; NMDA receptor; Flupirtine; Memantine **116**, 193

Apoptosis; Neuroprotection; Parkinson's disease; Propargylamine; Rasagiline; Mitochondrial membrane potential **116**, 181

ATP synthase; Mitochondrial DNA; Longevity; Single nucleotide polymorphism; Centenarian; NADH dehydrogenase **116**, 65

Body composition; Energy intake; Energy metabolism; Aging; Anorexia **116**, 157

Bone formation; Active vitamin D; Osteoporosis; Bone resorption **116**, 103

Bone mineral density; Transforming growth factor-β1; Polymorphism; Osteoporosis; Osteoarthritis; Postmenopausal women **116**, 113

Bone resorption; Active vitamin D; Osteoporosis; Bone formation **116**, 103

Cancer chemoprevention; Isothiocyanate; Wasabi; Platelet aggregation; Phase II enzyme; Glutathione *S*-transferase **116**, 125

Centenarian; Mitochondrial DNA; Longevity; Single nucleotide polymorphism; NADH dehydrogenase; ATP synthase **116**, 65

Cerebrospinal fluid; Creutzfeldt–Jakob disease; Prion protein; Neurotoxicity; Apoptosis; Oxidative stress; 14-3-3 protein; NMDA receptor; Flupirtine; Memantine **116**, 193

PII: S0047-6374(00)00162-7

Colonic mucosa; Aging; Cyclins; Cyclin-dependent kinases; $p21^{Waf-1}$; p53; Retinoblastoma **116**, 1

Creutzfeldt–Jakob disease; Prion protein; Neurotoxicity; Apoptosis; Oxidative stress; Cerebrospinal fluid; 14-3-3 protein; NMDA receptor; Flupirtine; Memantine **116**, 193

Cyclin-dependent kinases; Aging; Colonic mucosa; Cyclins; $p21^{Waf-1}$; p53; Retinoblastoma **116**, 1

Cyclins; Aging; Colonic mucosa; Cyclin-dependent kinases; $p21^{Waf-1}$; p53; Retinoblastoma **116**, 1

Detoxification enzymes; Prostaglandins; Glutathione *S*-transferase; Antioxidants **116**, 135

Dietary supplementation; Membranes; Receptors; Polyphenolics **116**, 141

Energy intake; Energy metabolism; Aging; Anorexia; Body composition **116**, 157

Energy metabolism; Energy intake; Aging; Anorexia; Body composition **116**, 157

Fasting; Ageing; Glycogenolysis; Glycolytic flux; Ischemic contracture **116**, 15

Flupirtine; Creutzfeldt–Jakob disease; Prion protein; Neurotoxicity; Apoptosis; Oxidative stress; Cerebrospinal fluid; 14-3-3 protein; NMDA receptor; Memantine **116**, 193

Gene expression; Activator protein-1 (AP-1); Ageing; Nuclear factor-κB (NFκB); Skeletal muscle; Superoxide dismutase **116**, 33

Gene therapy; Adenovirus; Gene transfer; Nitric oxide synthase; Stroke; Vector **116**, 95

Gene therapy; Parkinson's disease; Huntington's disease; Motor performance; Neurotransmitter receptor; Striatum; Memory; Acetylcholine; Mutant mice **116**, 77

Gene transfer; Adenovirus; Gene therapy; Nitric oxide synthase; Stroke; Vector **116**, 95

Glutathione *S*-transferase; Isothiocyanate; Wasabi; Platelet aggregation; Phase II enzyme; Cancer chemoprevention **116**, 125

Glutathione *S*-transferase; Prostaglandins; Detoxification enzymes; Antioxidants **116**, 135

Glycogenolysis; Ageing; Fasting; Glycolytic flux; Ischemic contracture **116**, 15

Glycolytic flux; Ageing; Fasting; Glycogenolysis; Ischemic contracture **116**, 15

Huntington's disease; Gene therapy; Parkinson's disease; Motor performance; Neurotransmitter receptor; Striatum; Memory; Acetylcholine; Mutant mice **116**, 77

Ischemic contracture; Ageing; Fasting; Glycogenolysis; Glycolytic flux **116**, 15

Isothiocyanate; Wasabi; Platelet aggregation; Phase II enzyme; Glutathione *S*-transferase; Cancer chemoprevention **116**, 125

Longevity; Mitochondrial DNA; Single nucleotide polymorphism; Centenarian; NADH dehydrogenase; ATP synthase **116**, 65

Memantine; Creutzfeldt–Jakob disease; Prion protein; Neurotoxicity; Apoptosis; Oxidative stress; Cerebrospinal fluid; 14-3-3 protein; NMDA receptor; Flupirtine **116**, 193

Membranes; Receptors; Dietary supplementation; Polyphenolics **116**, 141

Memory; Gene therapy; Parkinson's disease; Huntington's disease; Motor performance; Neurotransmitter receptor; Striatum; Acetylcholine; Mutant mice **116**, 77

Mitochondrial DNA; Longevity; Single nucleotide polymorphism; Centenarian; NADH dehydrogenase; ATP synthase **116**, 65

Mitochondrial membrane potential; Apoptosis; Neuroprotection; Parkinson's disease; Propargylamine; Rasagiline **116**, 181

Motor performance; Gene therapy; Parkinson's disease; Huntington's disease; Neurotransmitter receptor; Striatum; Memory; Acetylcholine; Mutant mice **116**, 77

Mutant mice; Gene therapy; Parkinson's disease; Huntington's disease; Motor performance; Neurotransmitter receptor; Striatum; Memory; Acetylcholine **116**, 77

NADH dehydrogenase; Mitochondrial DNA; Longevity; Single nucleotide polymorphism; Centenarian; ATP synthase **116**, 65

Neurofibrillary tangles; Alzheimer disease; Oxidative stress **116**, 169

Neuroprotection; Apoptosis; Parkinson's disease; Propargylamine; Rasagiline; Mitochondrial membrane potential **116**, 181

Neurotoxicity; Creutzfeldt–Jakob disease; Prion protein; Apoptosis; Oxidative stress; Cerebrospinal fluid; 14-3-3 protein; NMDA receptor; Flupirtine; Memantine **116**, 193

Neurotransmitter receptor; Gene therapy; Parkinson's disease; Huntington's disease; Motor performance; Striatum; Memory; Acetylcholine; Mutant mice **116**, 77

Nitric oxide synthase; Adenovirus; Gene therapy; Gene transfer; Stroke; Vector **116**, 95

NMDA receptor; Creutzfeldt–Jakob disease; Prion protein; Neurotoxicity; Apoptosis; Oxidative stress; Cerebrospinal fluid; 14-3-3 protein; Flupirtine; Memantine **116**, 193

Nuclear factor-κB (NFκB); Activator protein-1 (AP-1); Ageing; Gene expression; Skeletal muscle; Superoxide dismutase **116**, 33

Osteoarthritis; Transforming growth factor-β1; Polymorphism; Bone mineral density; Osteoporosis; Postmenopausal women **116**, 113

Osteoporosis; Active vitamin D; Bone resorption; Bone formation **116**, 103

Osteoporosis; Transforming growth factor-β1; Polymorphism; Bone mineral density; Osteoarthritis; Postmenopausal women **116**, 113

Oxidative stress; Alzheimer disease; Neurofibrillary tangles **116**, 169

Oxidative stress; Creutzfeldt–Jakob disease; Prion protein; Neurotoxicity; Apoptosis; Cerebrospinal fluid; 14-3-3 protein; NMDA receptor; Flupirtine; Memantine **116**, 193

p53; Aging; Colonic mucosa; Cyclins; Cyclin-dependent kinases; $p21^{Waf-1}$; Retinoblastoma **116**, 1

Parkinson's disease; Apoptosis; Neuroprotection; Propargylamine; Rasagiline; Mitochondrial membrane potential **116**, 181

Parkinson's disease; Gene therapy; Huntington's disease; Motor performance; Neurotransmitter receptor; Striatum; Memory; Acetylcholine; Mutant mice **116**, 77

Phase II enzyme; Isothiocyanate; Wasabi; Platelet aggregation; Glutathione *S*-transferase; Cancer chemoprevention **116**, 125

Platelet aggregation; Isothiocyanate; Wasabi; Phase II enzyme; Glutathione *S*-transferase; Cancer chemoprevention **116**, 125

Polymorphism; Transforming growth factor-β1; Bone mineral density; Osteoporosis; Osteoarthritis; Postmenopausal women **116**, 113

Polyphenolics; Membranes; Receptors; Dietary supplementation **116**, 141

Postmenopausal women; Transforming growth factor-β1; Polymorphism; Bone mineral density; Osteoporosis; Osteoarthritis **116**, 113

Prion protein; Creutzfeldt–Jakob disease; Neurotoxicity; Apoptosis; Oxidative stress; Cerebrospinal fluid; 14-3-3 protein; NMDA receptor; Flupirtine; Memantine **116**, 193

Propargylamine; Apoptosis; Neuroprotection; Parkinson's disease; Rasagiline; Mitochondrial membrane potential **116**, 181

Prostaglandins; Glutathione *S*-transferase; Detoxification enzymes; Antioxidants **116**, 135

14-3-3 protein; Creutzfeldt–Jakob disease; Prion protein; Neurotoxicity; Apoptosis; Oxidative stress; Cerebrospinal fluid; NMDA receptor; Flupirtine; Memantine **116**, 193

$p21^{Waf-1}$; Aging; Colonic mucosa; Cyclins; Cyclin-dependent kinases; p53; Retinoblastoma **116**, 1

Rasagiline; Apoptosis; Neuroprotection; Parkinson's disease; Propargylamine; Mitochondrial membrane potential **116**, 181

Receptors; Membranes; Dietary supplementation; Polyphenolics **116**, 141

Retinoblastoma; Aging; Colonic mucosa; Cyclins; Cyclin-dependent kinases; $p21^{Waf-1}$; p53 **116**, 1

Single nucleotide polymorphism; Mitochondrial DNA; Longevity; Centenarian; NADH dehydrogenase; ATP synthase **116**, 65

Skeletal muscle; Activator protein-1 (AP-1); Ageing; Gene expression; Nuclear factor-κB (NFκB); Superoxide dismutase **116**, 33

Striatum; Gene therapy; Parkinson's disease; Huntington's disease; Motor performance; Neurotransmitter receptor; Memory; Acetylcholine; Mutant mice **116**, 77

Stroke; Adenovirus; Gene therapy; Gene transfer; Nitric oxide synthase; Vector **116**, 95

Superoxide dismutase; Activator protein-1 (AP-1); Ageing; Gene expression; Nuclear factor-κB (NFκB); Skeletal muscle **116**, 33

Transforming growth factor-β1; Polymorphism; Bone mineral density; Osteoporosis; Osteoarthritis; Postmenopausal women **116**, 113

Vector; Adenovirus; Gene therapy; Gene transfer; Nitric oxide synthase; Stroke **116**, 95

Wasabi; Isothiocyanate; Platelet aggregation; Phase II enzyme; Glutathione *S*-transferase; Cancer chemoprevention **116**, 125
